

Wall mounted iPad Frames

Ideal for building automation system touchscreens

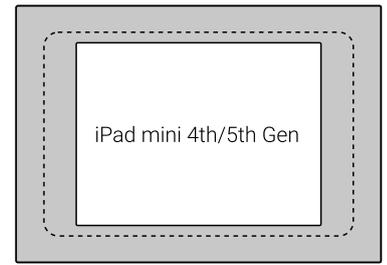

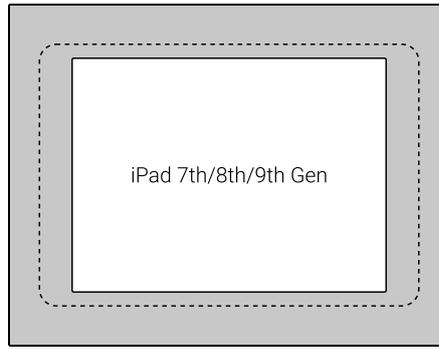

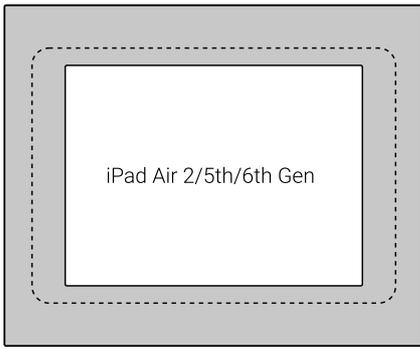

The challenge

When it comes to having the best wall touchscreen display possible for an automation system it's hard to go past the brilliance and high resolution of an iPad. The challenge has been to make the wall mount look as good as the iPad display. At Vivisys, we weren't happy with the typical wall mounted iPad frames on the market so we set about creating our own. We hope you like them!

All our wall mounted iPad frames:

- Are constructed from high gloss acrylic to match the gloss display of the iPad.
- Hide the home button since gestures avoid needing home button access.
- Are easy to install and do not require a recess to be cut into the wall.
- Have a slimline profile, with total depths of 12 mm (for iPad mini) and 13.5 mm (for iPad).
- Are available in black or white, or other custom colours upon request.

iPad Frame models

Frame model number	FRAMEIPAD1WH (white) FRAMEIPAD1BL (black)	FRAMEIPAD2WH (white) FRAMEIPAD2BL (black)	FRAMEIPADMINI1WH (white) FRAMEIPADMINI1BL (black)
Suits iPad models	iPad Air 2/5th/6th Gen	iPad 7th/8th/9th Gen	iPad mini 4th/5th Gen
iPad size (mm)	240 (W) x 169.5 (H) x 6.1/7.5 (D)	250.6 (W) x 174.1 (H) x 7.5 (D)	203.1 (W) x 134.8 (H) x 6.1 (D)
Overall frame size (mm)	277 (W) x 227 (H) x 13.5 (D)	291 (W) x 227 (H) x 13.5 (D)	240 (W) x 170 (H) x 12 (D)

Videos

We have a number of videos on our website that explain how to install and use our iPad frames.

We share our tips and tricks for getting the best user experience with a wall mounted iPad, along with explaining how to power the iPad using Power Over Ethernet (POE) if required.

Accessories

The iPads are powered by leads that come into the frame from behind (on the right hand side). To make the frames as compact as possible, leads with small right-angled lightning plugs are required. Where power is close by, the simple 1.2 m lead can be used (extendable to a total length of about 3 m with an optional extension lead). For greater lengths, a POE lead is recommended.

Part numbers

Part number	Description
FRAMEIPAD1WH	iPad Frame White (suits Air 2, 5th Gen, and 6th Gen iPads)
FRAMEIPAD1BL	iPad Frame Black (suits Air 2, 5th Gen, and 6th Gen iPads)
FRAMEIPAD2WH	iPad Frame White (suits 7th, 8th, and 9th Gen iPads)
FRAMEIPAD2BL	iPad Frame Black (suits 7th, 8th, and 9th Gen iPads)
